MOHAMMED NIHAL S

+91 7012671136 | mohammednihal1026@gmail.com | github.com/mnihal-dev | Thrissur, Kerala

PROFESSIONAL OBJECTIVE

Highly motivated Computer Science and Business Systems undergraduate seeking a Trainee Analyst role to leverage my technical expertise, analytical skills, and collaborative mindset to contribute to organizational success while continuously learning and advancing as an IT professional

EDUCATION

B.Tech in Computer Science and Business Systems
JCT College of Engineering and Technology, Coimbatore (Expected 2027)

Diploma in Computer Engineering
Maharajas Technological Institute, Thrissur (2022)

Higher Secondary Education
Chaldean Syrian Higher Secondary School, Thrissur (2020)

RELEVANT COURSEWORK

Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Computer Networks

PROFESSIONAL EXPERIENCE

Data Science & Machine Learning Intern | Cyborg AI Gen Automation *2025*

- Completed an intensive 30-day Agile-based data science and machine learning internship, focusing on building end-to-end predictive pipelines from requirements through deployment.
- Engineered an end-to-end predictive machine learning model for credit card fraud detection in the financial services domain, using Python, scikit-learn, and pandas — directly relevant to fraud risk analytics.
- Processed and standardized complex financial transaction datasets, applying SMOTE to resolve severe class imbalance and improve detection accuracy.
- Evaluated and compared multiple classification algorithms (Logistic Regression, Decision Trees, Random Forest, SVM) to select the highest-performing model.
- Conducted thorough Exploratory Data Analysis (EDA) to identify hidden anomalies, using matplotlib and seaborn for clear data visualization and stakeholder-ready reporting.

Telecom Engineer Trainee | IMMCO *2022 – 2023*

- Designed and monitored Fiber to the Home (FTTH) network infrastructure for Australian client projects utilizing spatial mapping softwares
- Analyzed physical infrastructure data to assess system integrity and proactively recommend upgrades to stakeholders, demonstrating cross-functional collaboration and clear technical communication.
- Conducted rigorous Quality Assurance (QA) on technical designs submitted by peers, evaluating workflows against strict project standards to approve or reject final deliverables.

SKILLS

Technical Skills: Python, Java, SQL, C, C++, HTML

Data & ML: scikit-learn, pandas, matplotlib, Exploratory Data Analysis

Tools & Practices: Git, Software Development Life Cycle (SDLC), QA Testing

Core Competencies: Cross-functional Collaboration, Stakeholder Communication, Problem-Solving

PROJECTS

Validex AI: An intelligent framework for UPI Payment verification and Fraud Detection

- Validex AI uses computer vision and OCR to extract data from an uploaded screenshot of a payment made using any UPI application and bank statement automating the verification process
- Enhances digital payment security by detecting fraudulent, edited, and duplicate payment screenshots using AI, OCR, and Computer Vision.

ACHIEVEMENTS & AWARDS

- Best Trainee Award, IMMCO (2022)

LANGUAGES

Malayalam, English, Tamil, Hindi
